EAST CHICAGO LEAD SEQUENTIAL RESULTS SCRIPT revised draft 12 01 16.docx

Attached is the latest version of the script. I was waiting to see what Miguel and Andrea had to say, but as a result of your request I am forwarding now.

Sorry I worked on the script also because the email was addressed to me. I didn't see Andrea copied and assumed he meant me. However, attached is a consolidated revision of the script incorporating the comment I got from Mary Hollingsworth. I'd like to tell folks we are done. Let me know what you think. Not sure if Chris, IDEM, and/or OPA will want to look at the revised version since it looks substantially different.

Hi Andrea,

I am trying to get the EC graphs done ahead of tomorrow's call with IDEM and next Saturday's open house. I talked with Brian about getting the lab data into scribe so he was going to talk to the SF folks yesterday but I haven't heard back. In the meantime I am working on the graphs since I don't want to have to do that over the weekend and I suspect next week's going to be real busy getting ready for the open house. So...

Can you please take a shot at updating the script? Attached are graphs for 7 of the 9 sites in Zone 3 with lead lines coming into the homes. Based on Tim D's updated lab schedule, it looks like it will be mid-December before we get that data validated, but once we do...we are going to have to include recommendations for the residents with LSLs since the LSL sites are all high and this may be what the whole city looks like in terms of lead levels at LSL homes. The only recommendation I can make is to tell them that they have to use filters and that we have talked to the City and State and they are working on increasing the ortho dosage to bring those levels down. This is going to have to extend to anyone in the city with LSLs so we should have that discussion with the City and State so that we are prepared once the results have been validated.

Hi Rita,

I hate to do this, but I was talking to SF folks yesterday and all excavation and sampling for the year has been completed, so the script will need to be updated because it refers to activities as if they are yet to be completed. I am heading in shortly and will work on this first thing when I get into the office.

We have gotten the draft script through the Regional Water Division management and would now like to solicit the R5 Office of Public Affairs and IDEM DW program review and input. We are ready to start making calls to residents in Zone 2 with lead results, so your input on this as soon as possible will allow us to start making calls. IDEM if you want to discuss on Friday's call, please let us know.
